### ETHICAL APPROACH

Vicenzi operates in the market, it feels that it has to deal with it and firmly believes in the approach of the market mechanisms generating efficiency, economic growth and wealth. However, accepting the market rules and challenges does not mean dealing only with it. The market is indeed a key factor, but it is not the only one a company has to cope with today.

Recognizing the importance of the expectations of all the people who are directly or indirectly related to the company is something closely connected with ethics, a value that, in its more genuine meaning, makes sense only if linked with individuals, who are recognized rights and dignity, and in a context where the reference values are clear.

The Board of Directors of Vicenzi formally adopted this Ethical Code to clearly define the set of values recognized, accepted, shared and deemed essential by Vicenzi to ensure the company's good operation, reliability and reputation.

The Company supervises the compliance with the Ethical Code with appropriate information, prevention and control tools, ensuring that transparent operations and conducts are implemented and taking corrective actions, if required.

The Ethical Code is integral part of the Organization, Management and Control Model adopted by the Company pursuant to Legislative Decree 231/2001. The Code is published on the Company's website
